

Chau Duc Toan - Fresher Flutter Developer

Phone: +84 941 544 797 | Email: toanpl060@gmail.com | Address: Thu Duc, HCMC

GitHub: <https://github.com/ToanChau> | Portfolio:  portfolio

SUMMARY

Dedicated Flutter Developer with a robust foundation in Software Architecture (Clean Architecture, BLoC, OOP). Proven experience in building and scaling production mobile applications, managing monorepos, and engineering reusable core packages. Skilled in implementing complex application logic, secure authentication flows, and automated CI/CD pipelines. Passionate about applying rigorous architectural thinking to deliver high-performance, maintainable, and user-centric mobile solutions

EDUCATION

Ho Chi Minh City University of Industry and Trade (HUIT)

- **Major:** Information Technology
- **GPA:** 3.55 / 4.0
- **English:** Basic communication, good at reading technical documents
- **Award:** Second Prize – Scientific Research Competition for Students (2025)

TECHNICAL SKILL

- **Programming Languages:** Dart, Python, C#, JavaScript, Swift.
- **Frameworks/Platforms:** Flutter (BLoC, MVVM, Clean Architecture), Firebase (Auth, Firestore,...).
- **Database:** Firebase, SQLite, SQL Server.
- **Tools & Architecture:** Git/GitLab, Docker, GraphQL, RESTful APIs, Melos (Monorepo), Nginx, Figma.
- **DevOps & CI/CD:** GitLab CI, Kaniko, App Store/Google Play Deployment, Shorebird (OTA Updates), APNs.

WORK EXPERIENCE

- **LongVan SystemSolution | Flutter Developer | 02/2026 – Present**
 - **Monorepo Architecture:** Managed a Melos monorepo for 3 production apps (SaleOne, DoctorHub, Longvan Wellness). Built reusable core packages via private GitLab, accelerating cross-app development.
 - **Auth & Tooling:** Implemented complex authentication flows (OAuth, native Apple Sign-in) with GraphQL. Engineered a custom Dart CLI generator to automatically scaffold design systems.
 - **Flutter Web & JS Interop:** Developed a JS bridge library enabling Flutter Web mini-apps to run seamlessly within external WebViews (ViettelMoney).
 - **DevOps & Release:** Set up GitLab CI/Kaniko deployment pipelines and Nginx caching. Configured **Shorebird** for seamless Over-The-Air (OTA) updates to deploy instant patches. Successfully published applications to the App Store and Google Play, ensuring strict compliance with review guidelines, and configured APNs push notifications.
- **AILOGY Technology JSC | Flutter Developer Intern | 06/2025 – 09/2025**
 - **Charge Services:** Refactored the booking flow and product variants. Enhanced UI consistency with Fluent UI and optimized authentication and pagination with REST APIs.
 - **Company Landing Page:** Fixed performance bottlenecks to improve animations. Applied the Flame package to optimize image and video rendering on Flutter Web.

PERSONAL PROJECT

1. CardWords (09/2025 - 11/2025)

Role: Team Leader - Team Size: 3

- **Description:** An English vocabulary learning application utilizing Flashcard method with "swipe" gestures (Tinder-like), supporting multi-environment deployment and offline capabilities.
- **Technologies:** Flutter, Dart, BLoC, Clean Architecture, Firebase (Auth, Firestore, Analytics), GetIt & Injectable, AppinioSwiper, Hive, FlutterSecureStorage, Spring Boot, Websocket, PostgreSQL, Redis, RAG + LLM, Docker.
- **Responsibilities:**
 - System Architecture: Architected and developed the entire application using Clean Architecture, ensuring a loosely coupled codebase, high scalability, and long-term maintainability.
 - Feature Development: Delivered comprehensive End-to-end features, including a Flashcard learning module and three interactive vocabulary games: Word-Meaning Matching, Image-Word Matching, and Quick Reflex.
 - Offline Capability: Implemented an Offline-first strategy to ensure a seamless user experience without internet connectivity, featuring automatic data synchronization (Auto-sync) once the connection is restored.
 - DevOps: Configured and managed the deployment pipeline, deploying the backend system to a VPS and the Web App version to Firebase Hosting.

2. HUIT E-Learn (03/2025 – 05/2025)

Role: Team Leader – Team Size: 5

- **Description:** Mobile app for HUIT students to search for courses, lecturers, materials, and share documents. Integrated AI-powered test creation tool.
- **Technologies:** Flutter, Dart, Firebase, Flask (Python), BLoC, GoRouter, RAG + LLM
- **Responsibilities:**
 - Developed full UI and app logic in Flutter.
 - Built backend using Firebase & Flask.
 - Integrated AI-based question generation using RAG + LLM.
